Totals Sales vs Total Returns by Sub

| | | | | | | |
|--------------|------------------------------|-------------------------|-------------------------|----------------------|-------------------------|------------|
| Introduction | Total Sales vs Total Returns | Return Rate by Category | Return Rate by Customer | Return Rate by Month | Highest Category Return | Conclusion |
|--------------|------------------------------|-------------------------|-------------------------|----------------------|-------------------------|------------|

In this Story, we will be discovering the main reasoning for returns within the categories and which categories are returned the most.

The variables discussed through this project will be Sales, Return Rate, Category, and Customers. This data was pulled from the Superstore sheet.

The first step was to see the total amount of sales to return ratio in the whole store. Next the search was refined to find the categories that were returned the most.
